

## Seminar: *"Single Cell Assays and Biomimetics for Pharmaceutical Research"*

**Xavier Casadevall i Solvas**  
Process Engineer

The expert from Morgan Sindall, Dr. Xavier Casadevall i Solvas, will review several applications of microfluidics and in particular of lab- and organ-on-a-chip technologies.

He will review examples on their utilisation for stem cell research, elucidation of disease mechanism, drug discovery and personalised medicine, highlighting how these techniques can be harnessed to obtain pharmaceutically-relevant information at superior levels of both quality and throughput.

**16:00** - Seminar: *"Single Cell Assays and  
17:00 Biomimetics for Pharmaceutical Research"*

---

**Starting** Networking Aperitif @Momento Caffè &  
**17:00** Lounge

---

**6<sup>th</sup> November 2018**

**Bio-Technopark® Schlieren-Zürich**
